# About Us

**IBACC Integrated Systems** is the result of bringing together two highly experienced and reputable entities **IBACC Inc.** and **Integr8 Services** combining more than 60 years of collective expertise in Low Voltage technology, design-build solutions, and fully integrated infrastructure.

As a licensed C-7 Low Voltage Systems Contractor in the State of California, we specialize in delivering high-performance network infrastructure and connected technology systems across **commercial, residential, educational, government and campus** environments.

Our project experience spans from cutting-edge retail and hospitality facilities to large multi-family developments, industrial operations, and public agency sites.

# Proven Process

## **01 — Consultation & Needs Assessment**

We begin with a collaborative consultation to understand your project scope, building functionality, and operational priorities.

## **02 — Custom System Design & Engineering**

Our design team develops a tailored low-voltage platform that includes structured cabling, security systems, access control, audiovisual systems, and communications infrastructure.

## **03 — Coordination with Architects & MEP Trades**

We work closely with the architectural and MEP teams to ensure pathways, power, equipment spaces, and environmental considerations are properly aligned.

## **04 — Professional Installation & Integration**

Once the design is approved, our skilled technicians execute installation with precision and adherence to industry standards.

## **05 — Testing, Certification & Quality Assurance**

All systems undergo comprehensive testing and commissioning. We validate signal integrity, device functionality, safety compliance, and proper documentation.

## **06 — Training, Handoff & Support**

We provide user training, as-built documentation, and warranty support to ensure smooth transition and long-term success.

## COPPER & FIBER STRUCTURED CABLING

We design and install robust structured cabling systems for data, voice, and video using copper and fiber backbones aligned with industry standards.

## ACCESS CONTROL & ENTRY SYSTEMS

Designs and installs secure, scalable Access Control Systems that protect people, property, and critical assets.

## SECURITY & SURVEILLANCE SYSTEMS

Designs and Build comprehensive Security and Surveillance Systems to enhance site safety. Solutions include IP-based video surveillance, network video recorders, remote monitoring, and intelligent video analytics

## AUDIO-VISUAL SYSTEMS

From conference rooms and command centers to digital signage and distributed audio systems, we deliver immersive AV experiences that enhance communication and collaboration.

## COMMERCIAL & EDUCATION TECHNOLOGY

A versatile platform engineered for retail, hospitality, and learning environments that require reliable connectivity and engaging digital interaction.

# OUR WORK ACROSS INDUSTRIES

## **Robinson Helicopter, Torrance CA**

Fiber Infrastructure, Supporting Network for Access Control, Security Camera and Machinery

- Connect 3 Mfg. Buildings from 220 ft to 1890 ft, Point to Point 10G Fiber Network
- Distribution to the existing Enclosure, DATA
- 96 Nodes, rated at 10GB, 112 Spare, tested at 2Km

## **UMEX/Universal Molding Company, Corona CA (255,000 sf)**

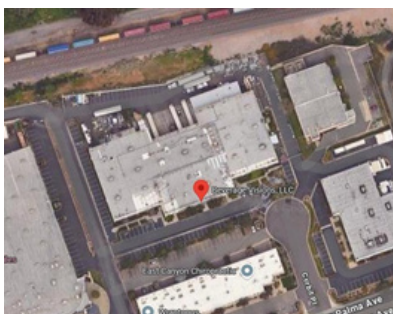

Repurpose IT Infrastructure, Security Camera, Access Control System, Setup Conference Room

- Repurpose and certify over 2800 Nodes (Data + VoIP)
- Installed 55 Access Points, including IoT Service
- Upgrade and Install Access Control System for 13 Doors and 2 Gates
- Design, Repurpose and Install 60 Cameras, AXIS Series
- Install 4 PTZ Cameras with, 360, Analogue Zoom 24, Digital 50

## **COAST FLIGHT Training, San Diego CA**

Security Camera, Access Control System

- Design and Build, 38 Indoor, Outdoor Cameras
- Design and Build, Access Control System 22 Doors, Gate, Intercom, Gate Control

## **Beverage Visions, Yorba Linda, California**

Design and Setup Access Control System

- HQ: 16 Doors, Point of Entries and Secure Labs
- Expansion Bldg., Design Modular expansion, P2P Management System, 12 Doors

# OUR WORK ACROSS INDUSTRIES

## **The Good and The Beautiful, Lehi UT (275,000 sf Campus)**

Fiber Infrastructure, Supporting Network for Access Control, Security Camera, Design Build Audio Visual System

- Internal Fiber Infrastructure
- Integrate Access Control Systems including ADA (24 Doors)
- Integrate Security Camera Systems, 64 Indoor & Outdoor
- Design Build Theatrical Audio Video System, 200" Projector Screen

## **VACA Group, Southern California (LA & OC)**

Multi Location Restaurant, Structured Cabling, Audio and Video Systems, Access Control and Security Camera Systems

- Structured Cabling
- Design Build Access Control Systems
- Design Build Security Camera Systems
- Design Build Commercial Audio Video System

## **NHN Global, Los Angeles CA**

Structured Cabling, Audio and Video Systems, Access Control and Security Camera Systems

- Structured Cabling
- Design Build Access Control Systems
- Design Build Security Camera Systems
- Design Build Commercial Audio Video System

## **Mission Ranch Market, Mission Viejo CA**

Structured Cabling, Audio and Video Systems, Security Camera Systems, Multi Platform Technology Integration

- Structured Cabling
- Design Build Security Camera Systems
- Design Build Commercial Audio Video System
- Design Build Digital Signage
- Design Build, Integration Information Board Systems (IBS)

# OUR WORK ACROSS INDUSTRIES

**JL Ala Moana, Honolulu HI**

Multi Family Residential Buildings, Access Control and Security Camera Systems

- Integarte Access Control Systems including ADA
- Design Build & Integration Security Camera Systems (1538 Kapiolani, 765 Amana, 1731 Kalākaua)

**EuroCar , Costa Mesa CA (55,000 sf)**

Structured Cabling, Audio and Video Systems, Access Control and Security Camera Systems, 300" Video Wall

- Structured Cabling
- Design Build Access Control Systems
- Design Build Security Camera Systems
- Design Build Commercial Audio Video System

**Baccarat Store, South Coast Plaza CA**

Structured Cabling, Audio and Video Systems, Access Control and Security Camera Systems

- Structured Cabling
- Design Build Commercial Audio System

**MARCHE Moderne, Newport Beach CA**

Structured Cabling, Audio Systems, Security Camera Systems, Multi Platform Technology Integration

- Structured Cabling
- Design Build Security Camera Systems
- Design Build Commercial Audio System and VoIP

# FACTORY TRAINED & AUTHORIZED INSTALLER

**IBACC Integrated Systems** is a certified low-voltage and technology systems integrator, licensed under the California Contractors State License Board (CSLB) with a C-7 Low Voltage Systems License (IBACC INC. #1146985), authorized to design, install, and commission advanced communication, security, and audio-visual infrastructure across commercial and industrial environments.

Our technical team is built on industry-recognized credentials, including **AVIXA CTS (Certified Technology Specialist)** certification, demonstrating proven expertise in the deployment, configuration, and support of integrated audio-visual systems aligned with ANSI-accredited standards. We actively adhere to AVIXA best practices for performance verification, signal management, interoperability, and end-user experience.

IBACC is also guided by **BICSI standards and methodologies**, ensuring our structured cabling designs meet the highest benchmarks for performance, longevity, and compliance. From fiber and copper infrastructure to pathway planning and rack integration, our solutions are engineered to ANSI/TIA, NEC, NFPA, UL, and applicable AHJ requirements. BICSI training reinforces our commitment to:

- **Proper design and layout of inside-plant cable systems**
- **Certification testing and documentation of installed infrastructure**
- **Scalable designs aligned with future-ready technology**

As part of our continuing professional advancement, IBACC is currently on track to secure **AVIXA CTS-D (Design) certification** placing us in the most elite tier of AV engineering professionals capable of leading full-scale design development, performance modeling, technology evaluation, and multi-disciplinary coordination with architects, engineers, and consultants.

# THANK YOU

---

Thank you for taking the time to review our qualifications.

We value the opportunity to present our capabilities and look forward to the potential of supporting your upcoming projects.

We truly appreciate your consideration and the chance to earn your business.

**Richard Ramer**

Co-Founder & COO

**IBACC INTEGRATED SYSTEMS**
